Semantic Bundle	Distributed SMW
Mediawiki + Ubuntu	

High performance lowers gasoline costs
 Ontologies do NOT equal Folksonomies
 Properties = verbs & prepositions (all nouns are "Type:noun")
 Facets = Tag:adjective & Tag:participle ("Category" pages)
 Pagenames = QNAMEs (not NAMEs)
 Survey & Batch are key for local Linked Open Data
 Semantic Templates are new, are in Ontology Bundles

Best Practices for South African
